

ANDREW WILKINS

IT Support Specialist | Systems Administration & Business Process Automation

Oakland, CA • (720) 390-8088 • andrewrblakewilkins@gmail.com • linkedin.com/in/wilkins-andrew

PROFESSIONAL SUMMARY

IT professional in training with a Bachelor's degree in Information Technology underway (Full Sail, 2027) and three hands-on technical projects spanning network infrastructure, Linux systems administration, and business process automation. Brings 10+ years of technical operations, B2B account management, and high-volume customer support experience, including HIPAA-compliant environments. Designed and deployed a full office LAN with Windows Server and RAID-backed storage, built and administers a Debian-based NAS and automated backup server, and developed a Salesforce automation solution with Flow-driven provisioning and executive reporting. Eager to apply strong troubleshooting instincts and self-directed technical learning to an entry-level IT Support or Salesforce Administrator role.

TECHNICAL SKILLS

Infrastructure & Networking: Windows Server 2025, Domain Controller Setup, RAID 5, LAN Design, VoIP Configuration

Linux & Systems Administration: Debian Linux, OpenMediaVault (OMV), Samba/SMB Configuration (incl. vfs_fruit for Time Machine), POSIX Permissions, rsync, screen, S.M.A.R.T. Disk Monitoring

Security: SonicWall Firewall Deployment, FIPS 140-2 Compliance, Role-Based Access Control, HIPAA Data Handling

Salesforce & Business Systems: Flow Builder (Record-Triggered Automation), Custom Object & Data Modeling, Object Relationships (Lookup/Master-Detail), Reports & Dashboards

Software & Tools: Salesforce (Self-Study), CRM Systems, Adobe Creative Cloud (Photoshop / Lightroom)

Professional: Technical Support / First-Call Resolution, B2B Account Management, Cross-Functional Collaboration, Project Coordination, Technical Documentation

TECHNICAL PROJECTS

Full LAN Design & Deployment — Marconi Law Firm (Simulated Client)

June 2025 – Present

Full Sail University — Academic Capstone Project

- Designed and deployed a full LAN for a 4,000 sq/ft, 10-user legal office from the ground up, handling cross-functional collaboration, planning, procurement, and configuration.
- Configured a Windows Server 2025 domain controller with RAID 5 for secure, redundant data storage and centralized user management.
- Deployed a SonicWall firewall and enforced FIPS 140-2 compliance, implementing role-based access controls to protect sensitive client data.
- Engineered an end-to-end hardware procurement strategy, cutting total deployment time by 15%.
- Conducted a full infrastructure audit to isolate security bottlenecks, achieving 100% uptime during the office migration.

Home Lab NAS & Automated Backup Server — Personal Project

2026

- Architected and deployed a dedicated home lab NAS and automated backup server on an x86 mini PC running Debian Linux with OpenMediaVault (OMV).
- Managed two independent 4TB EXT4 storage volumes mounted by immutable UUID — a primary drive shared via SMB for creative media storage and a secondary drive configured for native Apple Time Machine backup using the vfs_fruit Samba module.
- Migrated approximately 1.1TB of data via rsync in detached screen sessions, ensuring reliable, uninterrupted background transfers.
- Implemented POSIX permission structures (775, root:users) and configured S.M.A.R.T. disk telemetry for proactive hardware health monitoring.

Salesforce CSM Onboarding & Command Center Solution — Personal Project

2026

- Designed a custom Salesforce data model with two related custom objects (Client Onboarding Project, Onboarding Milestone) linked to standard Account and Opportunity records via Lookup and Master-Detail relationships.
- Built a Record-Triggered Flow that automatically provisions an onboarding project and initial milestone record when an Opportunity reaches Closed Won, eliminating manual handoff between Sales and Customer Success teams.
- Developed custom reports and an executive 'CSM Command Center' dashboard providing real-time visibility into onboarding volume, milestone completion rates, and cross-team handoff velocity.
- Modeled a complete post-sales business process end-to-end — from trigger logic to leadership-facing reporting — demonstrating core administrator competencies in data modeling, automation, and analytics.

PROFESSIONAL EXPERIENCE

Delivery and Logistics Specialist

January 2024 – Present

Jet Delivery / SDK Logistics, Orland, CA

- Orchestrated high-velocity delivery routes, consistently completing 150-180 stops daily while sustaining a 98% on-time performance record.
- Leveraged GPS and logistics software to troubleshoot and optimize routes in real time, mitigating delivery delays by 15% despite handling over 150 stops per day.
- Resolved 10-15 complex delivery escalations daily, maintaining high customer retention through timely, professional communication and real-time status updates.
- Standardized a vehicle pre-trip inspection checklist to proactively identify maintenance needs, minimizing vehicle downtime by 10% and preventing mid-route breakdowns.

Inside Sales Representative

February 2021 – November 2022

Ferguson Home (formerly Build.com), Chico, CA

- Oversaw a portfolio of 30+ active B2B contractor accounts, providing consultative expertise and increasing repeat order frequency by 15% year-over-year.
- Controlled 40+ daily inbound and outbound inquiries, accurately processing \$15k-\$20k in weekly orders across a catalog of thousands of complex SKU items using CRM systems.
- Partnered with Outside Sales representatives to accelerate the quoting process, expediting order turnaround time by 20% and supporting 10% territory revenue growth.
- Developed a personal knowledge base for complex product inquiries, elevating customer service standards while reducing manager escalations and customer wait times by 15%.

Customer Support Representative

December 2020 – February 2021

United Health Care, Chico, CA

- Served as the primary contact for member inquiries on health coverage, claims, and benefits, targeting first-call resolution.
- Navigated and troubleshooted complex proprietary systems to resolve member issues efficiently under high call volume.
- Maintained strict HIPAA compliance while handling sensitive member information, with zero compliance incidents.
- Authored a comprehensive Quick-Reference troubleshooting guide, streamlining onboarding and enhancing new team members' ability to resolve inquiries while maintaining HIPAA compliance.

CNC Operator

January 2014 – March 2015

Rescue 42, Chico, CA

- Executed rigorous quality control protocols using precision tools, achieving a 99% compliance rate and reducing material scrap by 5% through early defect identification.

CERTIFICATIONS

- Salesforce Administrator Certification — In Progress (Target: Q1 2027)
- CompTIA A+ Certification — In Progress (Target: Q4 2026)
- CompTIA Network+ Certification — In Progress (Target: Q2 2027)
- Google IT Support Professional Certification — In Progress (Target: Q3 2026)

EDUCATION

Bachelor of Science in Information Technology (B.S.) — Full Sail University, Winter Park, FL (Expected November 2027) — GPA 4.0

Relevant Coursework: Advanced Networking, Cybersecurity Fundamentals, Server-Side Scripting, Cloud Networking

ADDITIONAL INFORMATION

- Owner/Photographer, Andrew Wilkins Photography (2017–Present) — manages end-to-end client relationships, contract negotiation, and digital workflows using Adobe Creative Cloud.
- Proficient in authoring SOPs and technical knowledge bases to streamline team efficiency; 10+ years in client-facing roles skilled in de-escalation and clear technical communication.
